Skeletal Dysplasia

SESSION 8 August 9-August 13
Solid Organ Transplant, Cardiology, & Rheumatology

EXPERIENCE THE JOY OF CAMP

Camp Korey empowers children and families living with serious medical conditions through year-round, life-

Residential Summer Camp

Each summer, Camp Korey welcomes children ages 7 to 16 for our five-day sessions. In each session, between early bird activities and evening campfires, children become artists, swimmers, fishers, stargazers, actors on stage, adventurers, and, most importantly, friends. Our campers form a unique community, living in cabins alongside other kids coping with similar medical conditions and life circumstances. With the support of both counselors and cabin mates, kids discover they are capable of doing things they never dreamed possible.

Family Weekend Program

Throughout the spring and fall, Camp Korey invites families who are living with the challenges of a medical condition to experience a weekend at camp. Family Weekends serve children ages 0-17, unless otherwise noted, with a serious medical illness, and their immediate family members. Campers come with their caregivers and siblings, sleeping overnight from Friday to Sunday at camp together. Our amazing families can bond over an authentic camp experience while making important connections to others.

BLOCK Program

The BLOCK program is for former campers, new campers, and siblings who are between the ages of 16-18. The mission of the BLOCK program is to provide former campers with an opportunity to participate in an alumni camper program which helps to enhance their skill development in areas that are important for future success, such as leadership, teamwork, communication, and decision-making skills.

Spring Family Weekend and Summer Camp 2020 applications open on January 3rd, 2020.
