

RECRUITING CHILDREN WITH INTELLECTUAL DISABILITY IN GRADES 1, 2, & 3

Purpose of the Study

The goal of our study is to increase our understanding of how children with intellectual disability develop in reading and language over time. We hope this will help teachers know what sort of growth to expect and how to tell if their reading intervention is working.

What does participation involve?

- Screening to determine if your child qualifies
- Yearly assessment in reading and language tests for 3 years
- Receive testing information each year at no cost
- Choose from 3 locations for assessment
- \$50 compensation for your child's time and effort
