

NEURONODE TRILOGY

PRODUCT PAGE

The **NEURONODE³** uses either 3D Spatial Sensors or the body's bioelectrical EMG (electromyographic) signals to completely control a computer to generate speech, browse the web, listen to music, and more. It is alternative/augmentative communication (AAC) technology that is easy to use and works for conditions like ALS (Lou Gehrig's Disease), MND, SCI, or Cerebral Palsy.

The NeuroNode Trilogy combines the power of three access methods: eye control, touch control, and NeuroNode³ control. This system provides a variety of access options for users in order to increase communication speed while decreasing fatigue.

The NeuroNode Trilogy includes a Windows based display device with Grid 3 Communication Software and the NeuroNode Controller Application, giving users and therapists versatile scanning and direct select technology for speech generation and environmental control.

A non-adhesive, reusable electrode snaps to the bottom of the NeuroNode³ which then snaps into the NeuroBand. The NeuroBand is a customizable comfortable band which anchors the NeuroNode³ directly to the chosen muscle site.

At the core of the NeuroNode³ Trilogy is the NeuroNode³, a wireless, non-invasive EMG or Spatial Sensor that communicates with the Windows display device via the Bluetooth Smart System.

The above are trademarks of the respective companies

The VHA has approved coverage from NeuroNode for qualified veterans with ALS.

The NeuroNode is listed and registered with the FDA as a Powered Communication System.

Price on delivery: \$16,500 USD + applicable taxes (includes free worldwide shipping)

NEURONODE TRILOGY

PRODUCT SPECIFICATIONS

The purchase of the NeuroNode Trilogy comes fully equipped and integrated with:

1. NeuroNode³ Control, wireless and wearable EMG/Spatial device
 - Non-adhesive, reusable NeuroBand
 - Hassle free charging kit
2. Touch Control with 12.3" Display Device, 128 GB, with Wi-Fi connectivity
 - Includes universal VESA mount plate, durable case, and stand
 - System weight is 5 lb, system size is approximately 12.5"x10"x1"
3. Eye Control with TM5 Mini
 - Connected via USB and securely mounted to display device
5. NeuroNode Controller Application with
 - Lifetime free upgrades
 - Self-adjusting user interface
5. Grid 3 Communication Software with
 - Various boarding applications for literacy level and ability
 - Unique speech generating tools and customizable keyboard
 - Self-learning letter and next-word prediction
6. 6-12 Month supply of clinical-grade adhesive EMG sensors when requested or required
 - Sent in four three-month supplies to ensure product quality and effectiveness
7. 12-Month 24/7 telepresence or in-person technical support, which includes:
 - Upgrades to the NeuroNode Controller Application
 - Accessibility software customization, when applicable
 - NeuroNode training for caregivers, family members, and clinicians
 - Product troubleshooting
8. 24-Month product warranty period, covering the cost and replacement of the NeuroNode device and battery charging kit.
 - This does not apply to accessories, which are available for purchase.

CONTROL BIONICS

SUPPORT + WARRANTY

Every Control Bionics System includes support that covers the NeuroNode³ and its software. The support also covers usability issues and basic customization of the user's accessibility software when applicable.

1. Live Telepresence Support

- Free online installation and setup session with live two-way webcam with a member of the Control Bionics Team.
- Free live online telepresence technical support, including two-way webcam support for 12-months. This enables Control Bionics to provide software upgrades and fixes remotely (at the user's request).

2. Legacy Transfer

- In the event that any of the Control Bionics Systems are transferred to another client, an online installation and setup session with system upgrades and one year of technical support may be purchased for \$1,250. This legacy transfer charge does not include parts replacement but may include minor repairs as needed.

WARRANTY

The NeuroNode³ device and included Charger Kit is guaranteed for two years (except in circumstances of loss or willful damage) and will be replaced free of charge if there are any issues with the equipment during the warranty period.

THIS WARRANTY DOES NOT APPLY TO ELECTRODES OR ACCESSORIES. All parts and accessories are available for purchase.

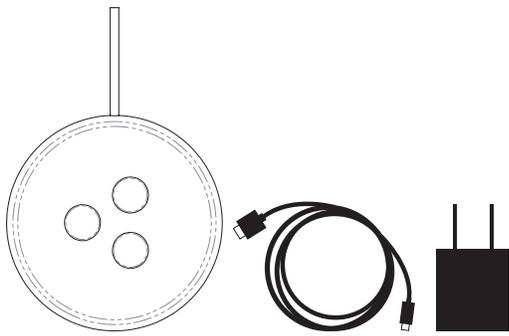

CONTROL BIONICS

CONSUMABLES

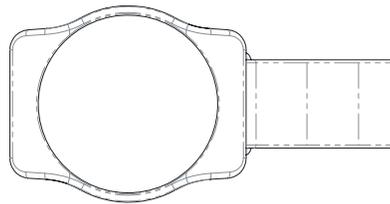

The **NEURONODE³** System and NeuroNode Trilogy include a non-adhesive electrode kit, NeuroBand, Leadwire Adapter Base, Charger Kit, and a one-year supply of either triple or single electrodes if required.

Other consumables that may be purchased are listed below. These include the above listed items if required after the warranty period.

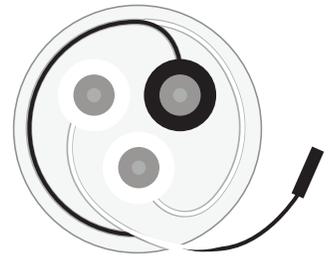

Please contact Control Bionics at 1-513-453-4848 for reordering any of the below consumables. Control Bionics may have alternative electrode options if required. All listed pricing is subject to change. Objects are not shown to scale.

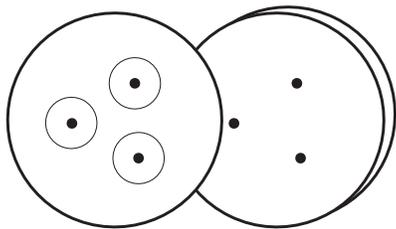

CHARGER KIT
Part #KIT-27-1200
\$500.00

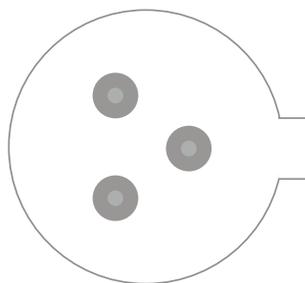

NEUROBAND
Part #KIT-27-1460
\$250.00

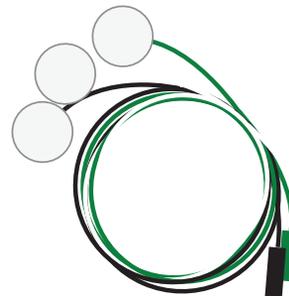

LEADWIRE ADAPTER BASE
Part #PL-27-1410
\$230.00

ELECTRODE
Non-Adhesive Kit
1 PKG
Part #KIT-27-1450
\$235.00

ELECTRODE
2 1/2" Triode
100/PKG
Part #T3402M
\$195.00/PKG

ELECTRODE
NeoLead
1 PKG
Part #N301/#N300
\$7.50/PKG

ELECTRODE
1 7/8" Square Cloth
50/PKG
Part #31043170
\$28.02/PKG
